

## Maximize your square footage

**Active Aqua introduces the Infinity Tray series**—an array of premium ABS panels that work with standard 4' wide benches. These trays are available in 4' and 8' center lengths, creating a continuous grow space when interlocked to maximize your square footage. All 4' end caps include designated drain sections. Center panels are also available with a drain option.

- Flood and drain setups are not recommended to exceed 64'. If your grow space requires additional benches, begin a new station with an Infinity endcap to set up another continuous station.
- Recommended use with our Rolling Bench System (AGT10001)
- All panels are low profile at 2.5" in height
- No arch lip allows you to maximize your inner and outer grow/work space
- All corresponding panels nest perfectly, allowing you to create custom lengths to suit your needs
- 10%–15% thicker than other bench trays

### **LOCTITE 5510 – Adhesive/Sealant: Easy application, watertight seal**

- Excellent performance as an all-in-one adhesive and sealant for dry and wet surfaces
- No solvents, no odor, no VOCs
- Non-yellowing, UV-resistant
- Begins to cure after 24 hours of application
- High flexibility—allows you to remove and reattach panels if necessary

## Why choose premium resin ABS for your plastics?

### **ABS (ACRYLONITRILE BUTADIENE STYRENE)**

- Chemical and heat resistant
- Stable and non-leaching
- 100% recyclable
- Stable through a broad range of temperatures with increased strength, rigidity, and chemical resistance

**VS.**

### **OTHER PLASTICS (POLYSTYRENE)**

- Poor barrier to oxygen and water vapor and has a relatively low melting point
- Polystyrene is very slow to biodegrade and is therefore a focus of controversy among environmentalists
- Flammable
